## **Nexgrid Enters Partnership with NexGen Utility Solutions**

**Locust Grove, VA. September 9, 2014**— NexGen Utility Solutions & Nexgrid® have entered into a strategic partnership providing the latest innovations in smart grid technology, combined with proven best practices for implementation and deployment.

“We are incredibly proud of NexGen’s strategic partnership with Nexgrid. They are drastically changing the way utilities, corporate customers, and consumers manage and monitor energy. Nexgrid’s advanced smart grid technology, wireless multi-mesh networks and real-time all the time communication solutions are considered best-in-class,” said Tim Strickland, President NexGen.

Nexgrid’s Multi-Mesh Smart Grid communications infrastructure provides utilities with a broadband, standards based solution including advanced metering, distribution automation, demand response, smart home and other applications on one seamless communication network. NexGen is capable of installing all of Nexgrid’s products including electric, water & gas meters, load control switches and thermostats anywhere in the country.

“We look forward to working with NexGen Utility Solutions on future Nexgrid Projects. They provide device installation solutions and technical resources to leading energy utilities, municipalities, and communications companies throughout North America. NexGen has the experience, manpower, resources and capability to handle Nexgrid’s Projects regardless of the scope, geographic span or project requirements,” stated Costa Apostolakis, CEO Nexgrid .

### **About Nexgrid**

Nexgrid, LLC is a US based company that provides an end-to-end solution for wireless smart grid and advanced metering. Nexgrid’s products provide utility companies and consumers the ability to manage and monitor their smart grid and smart home networks. Their solutions utilize high speed, 100% standards-based communications providing real-time data that enables energy management and utility operations. In addition to advanced metering of electric, water and gas, Nexgrid manufactures load control devices, capacitor bank controllers, thermostats and street light control hardware.

### **About NexGen Utility Solutions**

NexGen Utility Solutions is a provider of device installation solutions and technical resources to leading energy utilities, communications companies and OEM device manufacturers throughout the United States. The company implements, builds and supports America’s infrastructure: the smart grid, wireless communications systems, wireline telecommunications.

With a footprint that stretches across the United States, Canada, Mexico and the Caribbean, NexGen Utility Solutions has the experience, manpower, resources and capability to handle virtually any infrastructure project regardless of its scope, geographic span or underlying technology.
