**FOR IMMEDIATE RELEASE**

## **Nexgrid® Announces Participation in the 2013 DistribuTECH Conference & Exhibition**

**Locust Grove, VA. January 10, 2013** - Nexgrid, a leading provider of advanced metering and smart grid infrastructure based on open-standards, today announced that it will be participating in the DistribuTECH Conference & Exhibition in San Diego, CA.

"We are excited to be exhibiting at the DistribuTECH Conference & Exhibition this year. As a leader in standards-based smart grid solutions, Nexgrid is a natural fit for this event. We are proud to be unveiling our new customer portal mobile app at this event." said Haim Shaul, VP of Operations at Nexgrid.

### **About the DistribuTECH Conference & Exhibition**

DistribuTECH is the utility industry's leading smart grid conference and exposition, covering automation and control systems, energy efficiency, demand response, renewable energy integration, advanced metering, T&D system operation and reliability, power delivery equipment and water utility technology. Over 8,600 utility professionals in the electric, water, and gas industries from 48 countries attend DistribuTECH annually.

The conference features sessions on important topics facing the utility industry, covering all facets of utility governance and operations. It's a great tool for those in the industry to learn about trends, changes, and new ideas, as well as ways to develop practical programs to benefit their customers.

### **About Nexgrid**

Nexgrid is the emerging leader in broadband standards-based smart grid and smart home products. Nexgrid enables Utilities to deploy a scalable, reliable, and secure infrastructure for advanced metering and real-time monitoring that will scale as the needs of the smart grid grow over time.

Nexgrid's software suite allows Utilities and their customers (residential and commercial/industrial) to manage and monitor all aspects of the system through a unified portal/web/smart phone environment. The software supports all major web browsers, iPhone, iPad, Android, Blackberry, iGoogle, and any smart phone.
