FOR IMMEDIATE RELEASE

Nexgrid® Releasing its Smart Grid Mobile Customer Portal

Locust Grove, VA. March 4, 2013 - Nexgrid, a leading provider of advanced metering and smart grid solutions, today announced that it has released the mobile version of their intelaHome customer web portal, www.intelaHome.com.

Nexgrid's intelaHome is an energy management portal where consumers may control their homes smart home devices and view energy, water and gas usage. The new Mobile portal can be accessed by any smart phone using the browser allowing users to see their homes live energy consumption and have full control over devices such as thermostats, hot water heaters and other smart home devices within their home.

"Empowering customers to access both historical and real-time energy consumptions from any mobile device will enable more energy conscious end-users resulting in lower energy usage across the board," said Costa Apostolakis, CEO and Founder of Nexgrid. "With Nexgrid's intelaHome Mobile, it is even easier than ever to manage their homes energy usage from anywhere in the world".

intelaHome mobile is compatible with any smart phones browser including iPhone, iPad, Android, Windows and Blackberry devices by visiting www.intelahome.com.

About Nexgrid

Nexgrid LLC, a US based company that provides end to end solution for wireless smart grid and advanced metering. Nexgrid's products provide utility companies and consumers the ability to manage and monitor their smart grid and smart home networks. Their solutions utilize high speed, 100% standards-based communications that provide real-time data that enables energy management and utility operations. In addition to advanced metering of electric, water and gas Nexgrid manufactures intelligent end point devices including load control, capacitor bank controllers, thermostats and street light control hardware. Nexgrid's ecoOne enterprise software provides complete monitoring and control of meter data, network, load control, street light, outage and customer portal management all in one easy to use platform.
